

## Product Support Bulletin

**Title: Sportsmith Running Belt and Treadmill Lubricant, 1/2 Oz, Kit**

**Date: Dec 9, 2015**

**Apply one of the 1/2 oz packets of lube when you install your new running belt to insure the best performance. This also adds longer life for both the running belt and the deck. When applying a new belt, be sure that the deck surface is new. In some cases, you can flip your deck if the other side has not been used yet. If the deck does not have an unused side, a new deck must be purchased.**

**The second 1/2 oz packet of lube is for use during your next scheduled, routine maintenance. It is suggested by most major manufacturers to do routine maintenance monthly.**
